1. A device to remove kidney stones, comprising:

a handle having a distal end and a proximal end, the handle having a central conduit extending therethrough;

a fiber optic port disposed on the proximal end of said handle, the fiber optic port being in communication with said central conduit;

first and second fluid conduits disposed within said handle, each of the fluid conduits being in fluid communication with said central conduit;

a retrieval basket assembly extending from the distal end of said handle, the retrieval basket assembly having at least one lumen in fluid communication with said central conduit.

2. The device to remove kidney stones according to claim 1, further comprising first and second fluid connectors disposed on said handle, the first and second fluid connectors being in fluid communication with said first and second fluid conduits, respectively.

LITMAN LAW OFFICES, LTD. P.O. BOX 15035 ARLINGTON, VA 22215 (703) 486-1000

- 3. The device to remove kidney stones according to claim 1, further comprising first and second fluid valves disposed inline in said first and second fluid conduits, respectively.
- 4. The device to remove kidney stones according to claim 1, further comprising an electrically operated fluid pump disposed inline in one of said fluid conduits.
- 5. The device to remove kidney stones according to claim 4, further comprising an electrical switch in electrical communication with said fluid pump.
- 6. The device to remove kidney stones according to claim 4, further comprising a power source in electrical communication with said fluid pump.
- 7. The device to remove kidney stones according to claim 1, wherein said retrieval basket assembly comprises a sheath having at least one lumen, the sheath extending from said handle, the at least one lumen being in fluid communication with said central conduit.

8. The device to remove kidney stones according to claim 7, wherein said sheath has a distal end, a portion of the sheath at the distal end being expandable.

- 9. The device to remove kidney stones according to claim 7, wherein said retrieval basket assembly further comprises an elongated member slidably disposed within said sheath, the elongated member having a distal end.
- 10. The device to remove kidney stones according to claim 9, wherein said retrieval basket assembly further comprises a basket disposed on the distal end of said elongated member.
- 11. The device to remove kidney stones according to claim 9, wherein said elongated member comprises at least one lumen in fluid communication with said central conduit.
 - 12. A retrieval basket assembly, comprising:

a sheath having a proximal end and a distal end, the sheath having at least one lumen, a portion of the distal end being expandable in diameter;

an elongated member having a proximal end and a distal end, the elongated member being slidably disposed in the lumen of said sheath; and

a basket disposed on the distal end of said elongated member.
